

250 Sinker Drill

The 250 Drills have larger mating faces between major cylinder components for reduced air leakage and longer wearing life.

- ◆ All internal parts in 250 Sinkers are also used in 250 Jacklegs, Stoppers and Quarry drills.
- ◆ This Sinker Drill delivers high penetration and strong torque.
- ◆ Standard operating controls are located on the drill backhead.
- ◆ Positive lubrication with strong front end blow.
- ◆ Larger mating faces between major cylinder components for longer life and less wear.
- ◆ "T" Handle is spring loaded to reduce the transference of vibration from the rock drill to the drill operator's hands and arms. Lessens driller fatigue.
- ◆ Also available in Rigid Handle Model.
- ◆ Front end locking steel retainer for collared steel standard.
- ◆ Use with rock drill oil or grease.

Features

Large mating faces on components bodies for less wear and longer life. Reduced weight for ease of handling.

250 Sinker Specifications

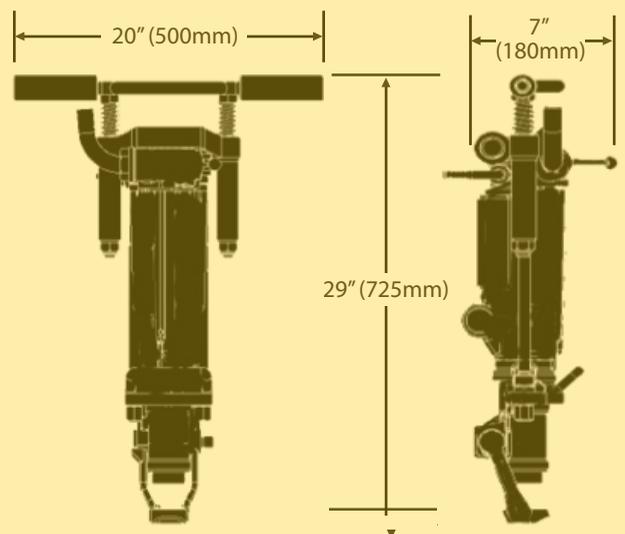

"T" HANDLE SINKER
